

Computer Repair Club

Welcome to the CRC!

What is this club about?

- We created this club to get people interested in computer hardware.
- Many electronics are wasted due to simple, fixable issues. This is known as **E-Waste**.
- E-Waste is becoming a growing problem as people discard devices they consider too slow or outdated when new technology is released.
- Our club wants to stop this issue.
- We take older or slow computers with minor issues and repair and upgrade them to give them a new life.

What is this club about?

For example, my family had an old computer from around 2013 that they had used for daily tasks. One day, it short circuited due to a power surge.

We were going to throw it out, but I thought of fixing it. I bought a \$40 part, and the computer started working again, and unnecessary wastage was prevented.

What will we do?

- Device refurbishing and repairs
- Campus E-Waste drive
- Teacher Tech Tune-ups
- Student Tech Help Desk during lunchtime
- Community Tech Repair Clinic
- Develop a Spare Parts library from donations

At the end of the year, we will publish a Tech Impact report documenting what we have accomplished.

Club Schedule

The club meeting will be held every Thursday from **3:30 PM to 4:30 PM after school.**

It is open to students from grades 9–12.

We will have occasional events on weekends as well.

There will be a \$10 admission fee to help raise funds for the club.

We Need Your Help

Even if you are not in the club, if you have any old computers/laptops or any hardware lying around, please donate it to the club.

These donations will greatly help in the club's projects.

Please get in touch with me if you have anything available.
